Profile

Fullstack developer with proven experience building and shipping production-grade web applications for real clients across property, energy, and humanitarian sectors. Skilled in end-to-end development from database design and REST API architecture to responsive front-end interfaces. Graduated with a GPA of 3.77 (S1 Teknik Informatika, UIN SGD Bandung) and consistently delivers clean, maintainable code using modern stacks including TypeScript, Laravel, React, and PostgreSQL. Thrives in collaborative environments and adapts quickly to new technologies.

Project Academic and Jobs experience

Fullstack Developer — Freelance

PT Loka Langit · flyforhumanity.com

Nov 2025 – Jan 2026

- Built a disaster mapping platform with real-time monitoring using Leaflet.js and PostgreSQL
- Developed scalable REST API with Express.js + TypeScript and a multi-level admin panel with role-based access control
- Managed large-scale geospatial data processing and relational database architecture

Fullstack Developer — Freelance

PT Loka Langit · client: PT Kalimantan Jawa Gas (kalijagas.com)

Mar – Jun 2025

- Built backend API endpoints for integration with web and mobile applications.
- Developed an admin dashboard for managing user activities and business operations.
- Integrated Zapier to connect Meta Ads and TikTok Ads automation workflows.
- Integrated WhatsApp API for direct communication between sales teams and potential leads.

Fullstack Developer — Contract

PT Hayasa Digital Tech · bosqueproperti.com

Dec 2024 – Mar 2025

- Designed and developed modern UI/UX interfaces tailored to company branding.
- Built fully responsive layouts optimized for all devices.
- Designed and managed relational databases using MySQL.
- Collaborated within a cross-functional development team to deliver production-quality software.
- Utilized Laravel 12, React, and Tailwind CSS for efficient and modern development workflow.
